Meet the Degsy, a contemporary single-level tiny home. Outfitted with clear cedar siding treated with a walnut stain, the exterior is a true eye-catcher. You’ll be ready to hit the road with this custom-built tiny house on a steel trailer with radial tires, safety brakes and leveling jacks.

Among the key features of this modern space are the oversized windows that provide lots of natural light. The kitchen, which is the focal point of the home, includes a solid surface countertop, a built-in cutting board, an ENERGY STAR refrigerator, and an electric cook-top. You’ll also be impressed by the high ceilings and beautiful walnut floors located throughout this 160 square foot home. Whether you are buying this home for your family or plan on entertaining guests for the weekend, this model has two functional bedrooms both with concealed storage compartments. This exclusive tiny home is awaiting your next adventure!
